

G2K Day/Night Camera

First Witness Video brings to the market the first ever Day/Night Camera designed for covert use. The Guardian 2000 Day/Night Camera uses a Military Third Gen Night Vision Tube from ITT. When activated, the camera switches between day and night modes depending on lighting conditions. The system will produce a high-resolution color picture during daylight hours or a high-resolution, light-intensified black & white picture at night. If a bright light source is observed within the field of view at night, the camera automatically switches to day mode in order to protect the Third Gen Tube. No other system offers nighttime video recording like this!

- Day camera mode: color
- Night camera mode: black/white
- Photosensitivity: 1600 uA/Lm
- Lux: .00001 Lux
- Field of view: 48 degree
- Dimensions: 7.25" x 2.75" x 2.5"
- Operational temp: -20C ~ 50C
- Tube gain: 50,000
- Tube resolution: 56-64 lp/mm
- Signal to noise: 16:1

Export of Night Vision products is regulated by the U.S. Department of State in accordance with the guidelines of "International Traffic in Arms Regulations (ITAR)" per Title 22, Code of Federal Regulations, Parts 120-130.
